

Toyota Forklift Parts

Toyota Forklift Part - Ever since 1992, Toyota Material Handling inc., U.S.A., also called TMHU, continues to be the top selling lift truck dealer in the U.S. This business has been based out of Irvine, California for well over 40 years, providing a complete line of quality lift trucks. With a great reputation of resilience and reliability, Toyota lift trucks have thrived in the competitive resources handling market. Quality is the cornerstone of Toyota's legendary Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, situated in Columbus, Indiana. The bulk of the Toyota lift trucks sold in the U.S.A are built here.

Every one of Toyota's manufacturing facilities within Canada and the United States comply with the International Organization for Standardization or ISO 14001 standard. TIEM has been honored many times for its commitment to persistent improvement, and its environmental methods. It is the first and only manufacturer to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. For instance, the Toyota 8-Series IC lift vehicles emit 70% less smog forming emissions than the existing centralized EPA standards and have complied with California's strict emission standards and policies.

TMHU, U.S.A. - Leading the Industry

The president of Toyota Material Handling, U.S.A., Brett Wood feels that TMHU's success comes from its dedication to manufacture high quality lift trucks while providing superb customer assistance and service. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues." TMHU's parent company, Toyota Industries Corporation, also called TICO, is listed in Fortune Magazine as the world's principal lift truck supplier and is amongst the magazines prominent World's Most Admired Companies.

New Meaning to Environmental Accountability

Toyota Industries Corporation, as the parent company, has instilled a rich corporate doctrine of environmental stewardship in Toyota. Not many other companies and no other lift truck manufacturer can meet Toyota's record of caring for the environment while concurrently stimulating the economy. Environmental accountability is a fundamental feature of company decision making at Toyota and they are proud to be the first and only producer to provide UL-listed, EPA - and CARB -certified Compressed Natural Gas powered lift vehicles. Yet another reason they remain a leader within the industry.

Toyota first released the 8-Series line of lift vehicles in 2006, again exhibiting its leadership and innovation in the industry. Featuring an exclusive emission system that eclipsed both Federal EPA emission values, and California's more environmentally friendly emission standards. The end creation is a lift truck that produces 70% less smog forming emissions than the existing Federal standards tolerate.

What's more in 2006, Toyota established a partnership with the Arbor Day Foundation, furthering their dedication to the environment. Greater than 57,000 trees have been planted in regional parks and national forests damaged by natural reasons such as fires, as a product of this relationship. 10,500 seedlings have also been scattered through Toyota Industrial Equipment's system of dealers to non-profit organizations and neighborhood customers to help sustain communities all over the U.S.

Toyota's lift trucks offer enhanced stability, visibility, output, ergonomics, and all the foremost safety equipment that has made Toyota an industry leader. The company's System of Active Stability, often known as "SAS", helps lessen the possibility of mishaps and injuries, and increasing productivity levels while minimizing the likelihood of product and equipment damage.

System Active Stability can sense factors that could lead to lateral volatility and potential lateral overturn. When one of these conditions have been sensed, the SAS will immediately engage the Swing Lock Cylinder to re-stabilize the rear axle. This changes the lift truck's stability trajectory from triangular in shape to rectangular, offering a major increase in stability which substantially reduces the likelihood of a mishap from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also aids to avoid injuries or accidents while adding strength.

SAS was first released to the market on the 7-Series internal combustion models in 1999 and subsequently catapulted Toyota into the industry leader for safety. Since then, SAS has been built-in to most of Toyota's internal combustion machines. It is standard gear on the new 8-Series. There are more than 100,000 SAS-equipped lift vehicles in action, exceeding 450 million hours combined. The increased population of SAS-equipped vehicles in the field, along with obligatory operator instruction, overturn fatalities across all brands have decreased by 13.6% since 1999. Furthermore, there has been an overall 35.5% decrease in industry wide collisions, loss of control, falls and overturn from a lift vehicle for the same period.

Toyota's pattern of brilliance reaches far beyond its technological achievements. The company maintains a widespread Operator Safety Training program to help users meet OSHA standard 1910.178. Instruction courses, videos and a variety of resources, covering a broad scope of matters-from individual safety, to OSHA regulations, to surface and cargo conditions, are available through the supplier network.

Toyota has sustained a relentless existence in the United States ever since its first sale. In 2009, Toyota Industrial Equipment Manufacturing, created its 350,000th lift vehicle. This reality is demonstrated by the statistic that 99% of Toyota lift trucks bought in America now are manufactured in the United States.

Situated in Columbus, Ind., the Toyota Industrial Equipment Mfg. campus equals 998,000 square feet of facilities across 126 acres. Facilities include a National Customer Center, as well as manufacturing operations and supply centers for equipment and service

components, with the whole commitment exceeding \$113 million dollars.

The new National Customer Center was conceived to serve both dealers and consumers of TMHU. The facility includes a 360-degree showroom, a presentation theater complete with stadium seating for 32, an area for live merchandise demonstrations with seating capacity for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's story since the birth of its creator, Sakichi Toyoda, in 1867, and finally a instruction center.

TMHU has 68 official industrial equipment dealers, along with 189 dealership locations all through the United States, offering the most comprehensive and inclusive consumer support and customer service in the industry. The company's new and Certified Used lift vehicles, service, parts, and financing features make Toyota dealerships a one-stop shop to guarantee overall client satisfaction.
